5 Open Questions

▸ **WHAT GOES HERE**

A question you cannot answer from what you have is a finding, not a failure. It belongs here, in writing, with the name of the person who can answer it and the date you need the answer by.

This section is graded, and an empty one is a warning sign. Every real project at this stage has open questions. A team reporting none has either not looked hard enough or has quietly invented answers — and an invented answer is a business decision the team had no authority to make.

Carry each open question forward into P2 with its resolution, or with a note that it is still open.

#	The question	Who can answer it	Needed by	What you assumed in the meantime
Q1	Should a student be able to move the status backward? (From rejected to interviewing if they made a mistake), or should status changes be linear?	Users	Developer	We assumed in FR-06 and FR-07 that students can change their status to any of the 4 statuses.
Q2	Beyond the 8 character threshold, will we add other password requirements (symbols, numbers, upper/lowercase) to increase user safety?	Development team	Needed by P2	FR-01 states only an 8 character minimum is needed, which is what we assumed.
Q3	Would a way to display application progress be beneficial, or needed for non-student external stakeholders?	Development team, students, recruiters, advisors	Needed by P3	We assume that this app's functionality will serve the user. But as advisors and recruiters have stakes in this app (see 2.2), it's reasonable to ask if we can add functionality to benefit them as well
